TERRAZZO

Terrazzo is the Italian word and the concept of terrazzo floor was invented by the workers in Venetia few centuries ago.

We at SIDDHI have reinvented the concept of terrazzo in modern flooring application by way of creating contemporary designs.

The collection consists of a wide range of colour pallets and it gives options in flat Terrazzo as well as terrazzo application in designs. The collection is made in a modern size of 60x60 cm. which gives the feeling of enlarged space.

This can be used for any floor application in residential as well as commercial areas. It goes well also in hotel and restaurants.

Most modern and trendy way to go is TERRAZZO floor from SIDDHI. Go for it!

NOTE: We are into the processing of surface decoration which is being done on the plain tiles sourced from the plain tiles manufacturers. The process of surface decoration is called third firing in which the screen printed designs are fired at around 1000 degree centigrade depending upon the material applied for decorating the surface. By doing this process basic characteristic value of tiles do not change. The body of the tiles will remain the same. So all the technical specifications given above pertain to the base tiles specifications as outsourced by us for our designing purpose.
